

Metropolitan Water District of Salt Lake & Sandy
Board Packet Information
Last Update: May 12, 2010

Agenda Item: Consider approval of Utah Lake Pumping Plant design contract.

Objective: Seek Board authorization to execute a Professional Services Agreement with the Bowen, Collins & Associates for the design and construction management services of the Utah Lake Pump Station Replacement Project.

Background: The Metropolitan Water District of Salt Lake & Sandy was asked by the Board of Canal Presidents (BOCP) to procure engineering services for the design and construction management for the replacement of the Utah Lake Pump Station.

As part of the Utah Lake Pump Station Replacement Project, the District advertised Statements of Qualification/Interest. From those expert firms that had responded, the District distributed a Statement of Work and request for proposals from four qualified consulting firms. Each firm submitted a proposal and was subsequently interviewed. The District, representatives from the BOCP and Consultant then negotiated a scope of work and revised fee. The revised fee, pending further negotiations, is \$879,746.00. The fee consists of \$532,118 for Final Design and \$347,628 for Construction Management services.

Recommendation: Authorize the chief procurement officer to execute a Professional Services Agreement with Bowen, Collins & Associates for the Utah Lake Pump Station Replacement Project in the amount of \$879,746 (pending further negotiations) only after the execution of the Engineering Cooperation Agreement.
