- Preston Bone**, Grounds worker
- Josh Larson**, Grounds worker
- Luke Fox**, Grounds worker

LABORATORY INFORMATION MANAGEMENT SYSTEM UPGRADE

The IT department recently completed a critical upgrade of the District's Laboratory Information Management System. In addition to bug fixes, the upgrade boasts a more intuitive user interface and increased operational efficiency. These new features will enable the lab to optimize their day-to-day procedures and compliance reporting. Leveraging the manufacturer's support contract provided IT with the expertise necessary to complete the upgrade quickly, minimizing system downtime. Obstacles encountered were promptly addressed thanks to the attentiveness of the lab department.
