June 23, 2023—This is an executive summary of the fiscal year (FY) 2024 adopted budget for the Metropolitan Water District of Salt Lake & Sandy (the "District").

The budget includes total budgeted revenue of \$51.1 million. This is based on a 3% increase to the member cities water sales fixed charge (\$/month). A 3% increase for non-member city water rates is also budgeted. Future water rate increases are anticipated to be 3% annually through FY 2027. Projected rate increases are consistent with previous forecasts.

Total budgeted expenditures are \$51.1 million. This reflects an increase of \$6.3 million in capital projects. The Operations and Maintenance (O&M) budget totals \$27.0 million (excluding interest, depreciation, and amortization) and now includes non-routine O&M costs and all Provo River Water Users Association (PRWUA) costs. This represents an 8.23% increase in expenses due to increased chemical costs and employee costs, including the addition of two full-time equivalents (FTEs) for workload and succession planning needs.

Additionally, this increase can be attributed to escalating assessments for Central Utah Project (CUP) Operation, Maintenance, and Replacement (OM&R) costs and related reserves. Costs related to CUP OM&R and related reserves are forecasted to continue to significantly increase over the next several years based on decisions of Central Utah Water Conservancy District. The forecasted increases are as follows (cost per acre foot):

- FY 2024: \$65.00 (8% increase)
- FY 2025: \$70.00 (8% increase)
- FY 2026: \$75.00 (7% increase)
- Increases beyond FY 2026 will be evaluated in the years leading up to FY 2027, with a stated need of the total cost to reach \$300 per acre foot.

The total FY 2024 capital budget is \$16.5 million. The total debt service budget is \$17.1 million. No new debt service activity is anticipated during FY 2024; additional refunding opportunities may be explored. A decrease in reserves of \$9.5 million is projected.

As previously noted, the adopted budget includes an increase of two FTEs and a 7% COLA/merit salary increase. The benefits plan includes District employees continuing to pay for 5% of the health insurance premium.

The annual allotment for the Provo River Project water supply is 100%.

Title: Salt Lake Aqueduct Replacement - Cottonwoods Conduit

**Description:** New pipeline to connect LCWTP and BCWTP and for Phase 1 of SLA/FW replacement.

Justification: The Salt Lake Aqueduct Replacement - Cottonwoods Connection will install a new pipeline to

connect the Big Cottonwood Water Treatment Plant (BCWTP) and Little Cottonwood Water Treatment Plant (LCWTP). Phase 1 will convey raw water from Big Cottonwood Creek to the LCWTP while the BCWTP is rebuilt. At an undetermined time after BCWTP is completed, the pipeline will be converted to a finished water facility as the first part of a parallel Salt Lake Aqueduct replacement to convey 145 mgd north of the LCWTP and resolve hydraulic

limitations between the LCWTP and 10 Million Gallon Reservoir. Design is in progress. Construction is anticipated to begin July 1, 2024.

Title: SCS Hardware and Software Replacement

**Description:** Replace and update security control system hardware at LCWTP and POMWTP.

**Justification:** The security control system (SCS) at LCWTP was installed between 1998 and 2000 and

at POMWTP between 2006 and 2008. The system is used to ensure security of District facilities and staff. Many of the components at LCWTP are beyond their design life and are no longer supported. Spare parts are difficult to obtain. The past 20 years have also provided many advancements in security equipment. This project will bring the District's SCS system to a modern standard. The FY2024 Request is a carryover from FY23 as a

result in shipping delays.

Title: LCC Replacement and Intake Modifications

**Description:** Replace the raw water Little Cottonwood Conduit and modify the lower intake structure.

**Justification:** In recent years impacts on the Murray penstock and hydroplant prevented the District

from obtaining and treating available Little Cottonwood Creek water. Inspections of the Little Cottonwood Conduit in 2011, 2012, and 2015 suggest the pipeline is in poor condition. Hydraulic and operational limitations at the Little Cottonwood Creek intake

have also prevented the District from capturing creek water.

This project seeks to improve supply reliability from Little Cottonwood Creek by replacing the Little Cottonwood Conduit and resolving limitations at the intake structure. The project is anticipated to occur in line with the Salt Lake Aqueduct Replacement, insomuch as both projects will impact raw water supplies and connections upstream of the

grit basin.

The District obtained ownership of the raw water Little Cottonwood Conduit in 2014.

Title: PC/S Hardware Replacement

**Description:** Replace and update Process Control / SCADA system hardware at POMWTP.

**Justification:** The process control / SCADA system (PC/S) at POMWTP was installed between 2006

and 2008 and is critical for plant operation. Many of the components at POMWTP are beyond their design life and are no longer supported. Spare parts are no longer made. The Power Monitoring Upgrade in FY2019 and 2020 upgraded the firmware and programming on most of the PC/S equipment at POMWTP, gaining three additional years of life for the equipment. It is now time to replace it. The first half of the equipment will be replaced in early 2023; the second half of the equipment will be

replaced in FY2024.

Title: Repair and Replace

**Description:** Routine repair and replace non-capacity capital investments.

**Justification:** Control valves on the LCWTP ozone system were inspected in 2021. The valves are wearing

from use, with five of the eleven valves identified for replacement. These valves will be

proactively replaced over the next four years, beginning with ozone destruct.

The District's fuel tank and dispenser monitoring hardware was installed in 2011. The equipment is at the end of its life and the software is no longer supported. This project will replace both with a more current, reliable, and supported system.

The LCWTP flash mixers introduce and mix chemical into water upstream of flocculation. The flash mixers are failing, with one being replaced in FY23 in the miscellaneous repair and replace. The second flash mixer will be replaced in FY24.

The Point of the Mountain Finished Water Pump Station has five pumps - two are operated with variable frequency drives (VFD) and three with reduced-voltage soft starts (RVSS). The equipment has reached the end of its design life and is experiencing increased maintenance and operation issues. One RVSS was replaced in FY22 and the two VFDs are being replaced in FY23. Staff plans to replace the remaining two RVSS, one each in FY24 and FY25.

The District's closed circuit television (CCTV) security system is 20 years old at LCWTP and 14 years old at POMWTP. The equipment has exceeded its expected life and is no longer supported by the manufacturer. The remaining two years of this project will split camera replacement at POMWTP.

Two UPS systems at the LCWTP arre scheduled for replacement.

The lab department requires replacement of an organics laboratory dishwasher, auto titrator, and microscope. Carryover of FY23 Inductive Coupled Plasma/ Mass Spectrometer (ICP/MS) purchase.

The District operates servers on multiple networks. These servers have a life expectancy of seven years. New servers host the most critical services for the first three to five years of the lifecycle and then are moved to a less critical role for the remainder of the life cycle.

LCWTP Caustic Recirculation Pump is a carryover from FY23 purchase due to delayed shipping.

5720-60	\$ 45,000	LCWTP Caustic Feed Pump Replacement: LCWTP chemical feed pumps were replaced in 2016 and 2018. The caustic feed pumps were not addressed in that project and now need to be replaced.
5720-60	\$ 50,000	LCWTP Floc/Sed - Bearings: Much of the equipment in the LCWTP flocculation and sediumentation basins is original to construction (1960). Staff is proactively maintaining the equipment, replacing as necessary, and purchasing additional spare parts to address future breaks more readily. This year the District hopes to purchase floc shaft bearings and sedimentation chains and pins.
5720-60 7	\$ 109,500	LCWTP Actuator Replacement Program: LCWTP actuators are beyond their expected life and are failing. This year staff hopes to purchase five actuators for the flocculation inlet gates, plus the connection structure inlet and outlet valves, and the filter-to-waste inlet valve (8 total).
5720-60	\$ 20,000	LCWTP Ozone Control Valve Replacement: Control valves on the LCWTP ozone system were inspected in 2021.  Three of these valves will be reconditioned with one acting as a spare.

# **Cash Flow Analysis Assumptions**

# METROPOLITAN WATER DISTRICT OF SALT LAKE & SANDY CASH FLOW ANALYSIS ASSUMPTIONS June 23, 2023

Fiscal year based on July 1 through June 30 of each year. Fiscal Year (FY) 2024 runs from July 1, 2023 thru June 30, 2024.

- 1a District Regular Operating Expenses: For FY 2023, the amount shown is the budgeted expenditures expected for June 30, 2023 based on the adopted budget for the period ending June 30, 2023. The amount shown is the budgeted expenditures expected for FY204. This column does not include Central Utah Project (CUP) costs shown in columns 4 and 10, depreciation, amortization, or interest expense. There is an assumed 3.0% annual increase for future years. This assumed increase is based on a 12-year average of District-controlled expenses.
- **1b. District Non-Routine Operating Expenses:** The amount shown is the budgeted expenditures expected for FY204. The column includes non-routine projects and those projects that do not qualify as capital budget expenses forecasted for next 10 years. There is a cost escalation of 2.0%, based on previous 10-year average, for future years.
- 2. CUP M&I System OM&R Cost (\$/acre foot): The CUP Operation, Maintenance, and Replacement (OM&R) cost is escalated at the average of 5.53%, based on a 20-year average.
- 3. CUP M&I System OM&R Reserve Cost (\$/acre foot): The CUP Operation, Maintenance, and Replacement (OM&R) reserve cost is escalated at the average of 11.52%. Financial plans being implemented by Central Utah Water Conservancy District (CUWCD) indicate an increase in the total CUP M&I System Water O&M Cost (column 2 plus column 3). The purpose of the escalating costs is to fund an asset management program to pay for aging (50 years or so old) infrastructure. The escalation is proposed as follows:
  - a. FY 2024: \$65.00 (8% increase)
  - b. FY 2025: \$70.00 (8% increase)
  - c. FY 2026: \$75.00 (7% increase)
  - d. Increases beyond FY 2026 will be evaluated in the years leading up to FY 2027 with a stated need of the total cost to reach \$300 per acre foot.
  - e. The escalated percentage in column 3 is based on a five-year average for FY22-FY26.
- 4. CUP M&I System Water O&M Cost: O&M cost of CUP M&I system water.
- 5. Total CUP M&I System Water Costs (including capital expenses): Total cost of CUP M&I system water (column 4 plus column 40).

# I. Background

## How the District's budget differs from the Member Cities

- The District checks the various sources to ensure the District is in line with the market, e.g., Consumer Price Index, World at Work, Tech Net, and other related sources.
- When setting the increases, a comparison is made with the two member cities and other local water districts.
- SLC being self-insured can add medical benefits the District cannot competitively match due to the difference in the number of employees; therefore, the District focuses on other fair benefits.
- Typically, the District believes in giving merit increases and tying COLA to merit. However, due to the current economic state and rate of inflation, the District is recommending a COLA and a merit increase for FY 2024. A 1% merit increase represents about \$67,000 (based on FY2024 budget for salaries and wages, less payroll taxes).
- Ultimately, we are governed as separate entities and each Board or City Council must do what they think is in the best interest of their employees.

# II. Staffing Levels

The chart below reflects the current and projected staffing levels.

Department	Cost Center	FY2023	FY2024
Administrative	10	7	8
Operations	22	14	13
Maintenance	23	24	24
Information Technology	24	8	9
Engineering	25	8	7
Instrumentation & Electrical	26	8	9
Lab	50	6	6
Totals		75	76

The projected staffing levels in FY24 include a net increase of one full-time equivalent (FTE). The increased staffing levels will address succession planning and workload needs at the District.

The Operations department requires 12 FTEs; however, Operations continues to budget for an extra Water System Operator to address one anticipated retirement in FY24. In addition, one FTE is being added to the Information Technology department as a permanent increase to manage workload and provide development opportunities. This FTE would be added midway through the fiscal year. One FTE is being added to the Instrumentation & Electrical Department as a permanent increase to manage workload. The increase in the Administrative department and the decrease in the Engineering department is due to the reclassification of an employee (Assistant General Manager/Chief Engineer).

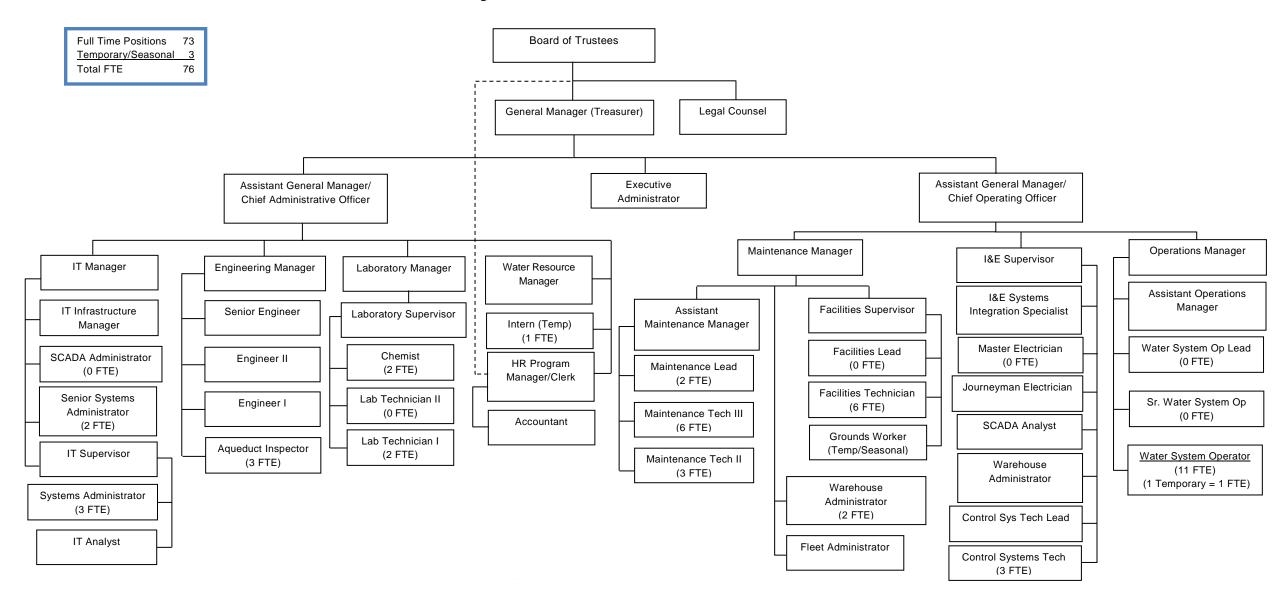

Attachment A represents the proposed staffing levels.

## III. Benefits

The District is interested in providing benefits that will help the District attract and retain skilled and experienced employees. The District is interested in maintaining reasonable stability and predictability for its employees and their families. The District is also interested in providing benefits reasonably comparable to those offered by other local entities similar to the District. The District provides employees with the following benefits package:

- · Medical and Dental Insurance
- · Vision Insurance
- · Health Savings Accounts
- · Flex Spending Accounts
- · Employee Wellness Program
- Life Insurance, Accidental Death and Dismemberment, Long Term Disability, and Long Term Care
- · EAP (Employee Assistance Program)
- · Retirement Program (Utah Retirement Systems or URS)
- · 401(k), 457, and Roth and Traditional IRA Retirement Savings Plans and Matching Program (via URS)
- · Paid Sick, Vacation, and Personal Leave
- · 13 Paid Holidays
- · Educational Assistance

The District is a member of the Utah Retirement Systems. The URS sets the District's contribution rate. The Tier I contribution rate for FY24 is 17.97%, no change from the prior year. The Tier II contribution rate is 16.19%, no change from the prior year. Sixty percent of the employees are Tier I employees. The Tier II group is gradually increasing with new hires at the District.

The District encourages employee wellness through a Participatory Wellness Program (PWP). The PWP provides an incentive for participation and is available without regard to an employee's health status. Employees who participate would receive \$500 in their HSA in 2024. The PWP incentive requires an employee to complete at least four of the nine available options before November 17, 2023. These options include the following: (1) flu shot, (2) preventative exam with personal physician, (3) biometric screening, (4) COVID vaccination/booster, (5) wellness challenge participation, (6) attending a lunch and learn, (7) Dexa Body scan, (8) age/gender/risk-appropriate screening with a personal physician, and (9) participation in wellness challenge through fitness app provided by the District.

## **Staffing and Compensation Schedule**

# IV. Job Grades & Salary Ranges

The District has a traditional pay structure with job grades and salary ranges for all District positions. The District will implement a 3.0% salary structure adjustment based on the information compiled from the 2022 Planning Packet Survey: 2023 Pay Increase Projections by Employers Council and the World at Work 49<sup>th</sup> Annual Salary Budget Survey. The salary adjustment will be for the non-management and IT pay structures. The salary adjustment shifts the salary range's midpoint and helps to maintain the District's position to provide competitive compensation. The salary structure adjustment does not increase the budget, nor does it offer an automatic 3% raise for any employee.

Annually an evaluation of market wage data is conducted to determine if the salary ranges for District positions are competitive with the market and internal equity. This analysis resulted in three positions being reassigned to a different pay grade. The following positions were reassigned to a higher pay grade: seasonal Grounds Worker, Lab Technician II, and Maintenance Lead. The reassignment of these positions does not increase the budget.

The District is proposing six new position titles: Facilities Technician Lead, Executive Administrator, Senior Water System Operator, Water System Operator Lead, Master Electrician, Engineering Manager. These new positions do not represent an increase in FTEs but a change in position descriptions.

The District is introducing a Management/Executive pay structure for supervisors, assistant managers, managers, assistant general managers, and the general manager. The separate pay structure allows the District to be more reflective of the market data.

# **Staffing and Compensation Schedule**

# V. Skill-Based Pay

The District continues to support a skill-based pay program to allow workforce flexibility and cross-training. This program has been successful by encouraging employees to learn additional skills in order to increase their productivity and efficiency. Skill-based pay is given based upon increased knowledge, skill, and ability. Employees who participate in the skill-based pay program receive their hourly wage and an additional skill-based pay for those successfully obtained skills.

As part of the FY24 budget, the District includes \$13,520.00 in salary and wages to support the program. The program will be expanded to include compensation for employees performing instrumentation calibration. Implementing this skill will be beneficial to the District because it will allow the opportunity to expand the program to the Lab department, which has previously not had the opportunity to participate in skill-based pay.

## VI. Wage and Salary Statistics

Historically, the District utilizes a merit pay system or pay-for-performance system to determine wage and salary increases. The District compares wage and salary increases with the member cities and other water districts. The District also evaluates the Consumer Price Index and Employment Cost Index from the U.S. Bureau of Labor Statistics. Wage and salary information are evaluated from the 49th Annual Salary Budget Survey 2022-2023 by World at Work and Employers Council 2022 Planning Packet Survey.

Based on these data points, the District is proposing a Cost-of-Living Adjustment (COLA) and merit increase for FY 2024. All employees would receive a 2.5% COLA on July 1 and up to a 4.5% merit increase in January 2024 for a total increase of 7%. The following table details the comparisons with member cities and other water districts:

## VII. Conclusion

Based on the proposed additional positions, COLA/merit increases of 7% to wages, retirement increases, payroll tax increases, and projected increases to medical, dental and other benefits, the total District budget increases by \$884,960. The various components are broken down as follows:

\$585,832	Salary & Wages
(\$3,327)	Overtime Premium
\$142,624	Medical Insurance Premiums (Health, Dental, Vision, Health Savings Account)
\$5,301	Other Insurance (Life, AD&D, LTD, Long Term Care)
\$47,263	Payroll Taxes
\$107,267	Utah Retirement

Based on the above, the net increase in personnel costs to the District is estimated to be 2.4% of the overall O&M Budget (excluding interest costs).
